

Celebrate with us this year as we celebrate MORE REASONS THAN EVER to celebrate our independence this year.

1. Of course it's our national independence day and marks the birth of our great nation 247 years ago, but we think this year should be even more celebratory as we celebrate other freedoms, such as:
2. Freedom from Google's hidden, undisclosed browser trackers using DNS 1.1.1.1. We lit and held a candle when we recommended a few years ago that EVERYONE implement DNS 1.1.1.1 to block Google from secretly tracking all your online behavior. Everyone who followed the recommendation is already enjoying enhanced privacy and freedom from trackers because DNS 1.1.1.1 has blocked Google from continuing to collect and aggregate your online browsing, and also from SELLING that information while Google continues to maintain it would NEVER do such a thing. Two years later, Google ACTUALLY continues to delay the removal it promised over two years ago... Those that followed us towards 1.1.1.1, celebrate with us...we've led many thousands towards the light, and those that haven't yet seen the light... it's NEVER too late!!
3. Enhanced Privacy measures opposing Google Chrome's invasiveness, with substantially enhanced privacy options such as Firefox.
4. ZERO Tolerance of CHEATERS! Regulators in close to 40 nations have now declared war on Google's cheating ad tech business, and now demand it's break-up! While long overdue, the regulatory backlash against massive cheating by Google is long overdue. The premise of Google being splintered into a billion parts by regulatory authority where small businesses again receive their rightful share again is the democratic principle being applied FULL FORCE!

5. A year ago, we announced that there would be a re-deployment of our apps into the Android and Apple playstores. That app development work continues through today (a FULL year in development now) and we are LESS THAN 90 days from launch!

We want to celebrate the re-launch of our apps and invite EVERYONE to participate in a FIVE MILLION DOLLAR software giveaway! As many of you know already, we sold our app for \$29.95 per user for PALM, TREO, Pocket PC, and Garmin Ique back starting in 2006 BECAUSE IT WORKED!! We sold thousands and thousands of licenses.

NOTE: Seeing that our source code (developed back in 2006-2008 and remains UNCHANGED in that same form today) which still accurately reports distances on your course today may create some concern about the giant tech companies' credibility, especially as it relates to who made the technology work ACCURATELY around the world FIRST. Those corporations of course include Google, Facebook, Amazon and Garmin. They built businesses worth trillions of dollars, KNOWING FULL WELL that more than a few of them stole our formula. Ask Garmin about their request to provide the source code of our app in 2007 BEFORE they ever had a working Golf GPS device, afterwhich they never contacted us again and cut-off our supply of Iques. Ask Google about it's muti-year deceptions about and attacks towards golftraxx.com

As part of the app re-launch announcement, we also declared that we would be **restoring** the download files to pdazip.com so that all former users (AND anyone else in the BILLION users with access to one of these devices) can now download and use for FREE our previously launched apps (non-iPhone platforms like PALM, Treo, Pocket PC, Garmin Ique. <https://golftraxx.com/downloads.htm>

There are a few different ways you can share the wealth in the \$5 Million Giveaway:

- a. After you download ANY of our prior app versions for FREE (Garmin Ique, Treo, PALM, Pocket PC), you can starting today also download (from within the app) ALL course data for our 30,000 courses (updated through today) thanks to our massive site remodel. Any user that sends us hard evidence (screenshots, course photos, etc) showing you successfully using any old version of our app on any of the 30,000 courses around the world will receive the brand NEW unlimited course version launching in the next 90 days for FREE! Extra credit (BOTH versions!!) for photos showing accuracy of the app versus yardage markers on the course.
- b. Any person who submits a clear photo of an up-to-date scorecard (where needed) based on comparison with our current website data (no matter how small the change needed might be) ALSO receives a free unlimited version of the new app launching within 90 days.
- c. Any person submitting a clear photo of a course map or layout or even a hand drawing (no matter how simple) that shows what direction is north for any unmapped course on our website or any course needing updated mapping (with explanation of change(s) needed) will also receive a FREE unlimited version of the new app launching within 90 days.
- d. Any person submitting a kml file or excel spreadsheet containing extras for a course where EITHER we have none or only have tips tees, or where the course is missing extras that should be there will also receive a FREE unlimited version of the new app launching within 90 days.
- e. Any person submitting hole flyover URLs from youtube for a course in an excel spreadsheet for copy/paste will also receive a FREE unlimited version of the new app launching within 90 days.
- f. Any person submitting hole text descriptions for a course in an excel spreadsheet for copy/paste will also receive a FREE unlimited version of the new app launching within 90 days.

As you can see there are LOTS of ways to win! As in over 180,00 ways! Our goal is to make the re-launch apps as successful as possible. To do this, we feel that ensuring that user experience is optimized for each and every course enables more users to have a GREAT experience!

There are now 5.4 million MORE reasons to celebrate. Have fun! Have a happy and SAFE 4th of July! Let us hear from you!
