

Those of you have followed golfraxx.com for awhile already know that we here at [golfraxx](http://golfraxx.com) continue to make recommendations on how to reduce Google's invasiveness into your lives. Today, we celebrate another such opportunity, and hence we display the independence day celebration banner once again, especially for small businesses like ourselves across the ENTIRE country!

We're just weeks removed from our national independence celebration where we celebrated other freedoms, such as:

2. Freedom from Google's hidden, undisclosed browser trackers using DNS 1.1.1.1. We lit and held a candle when we recommended a few years ago that recommended EVERYONE implement DNS 1.1.1.1 to block Google from secretly tracking all your online behavior. Everyone who followed the recommendation is already enjoying enhanced privacy and freedom from trackers because DNS 1.1.1.1 has blocked Google from continuing to collect and aggregate your online browsing, and also from SELLING that information while Google continues to despicably maintain it would "NEVER do such a thing." Two years later, Google ACTUALLY despicably continues to delay the removal of those trackers it promised to remove over two years ago... Those of you that followed us towards 1.1.1.1, CELEBRATE with us...we've led many thousands towards the light, and those that haven't yet seen the light... it's NEVER too late!!

3. Enhanced Privacy measures on browsers such as Firefox, Duck Duck Go and others in violent opposition to Google Chrome's invasiveness, who also support substantially enhanced privacy options.

4. ZERO Tolerance for CHEATERS! Regulators in close to 40 nations have now declared war on Google's cheating ad tech business, and now demand it's break-up! While long overdue, the regulatory backlash against massive cheating by Google is long overdue. The premise of Google being splintered

into a billion parts by regulatory authority where small businesses again receive their rightful share again is the democratic principle being applied FULL FORCE!

This new opportunity I present today is especially useful for those small businesses with a website who have already embraced Cloudflare, which of course can be signed up for FREE!

<https://www.cloudflare.com/>

Cloudflare enables the caching of your content in the cloud for super fast (and secure) delivery of that content to users everywhere! Cloudflare has enabled us here at golftraxx to grow our user base and dynamic content distribution massively to 150 countries around the world! Cloudflare also support DNS 1.1.1.1 which helps keep the prying eyes of Google away from your site and site visitors' activities.

If you already have cloudflare, RUN, don't walk to this next recommendation because this next recommendation takes Google further out of the picture... and I mean WAY FURTHER relative to your business.

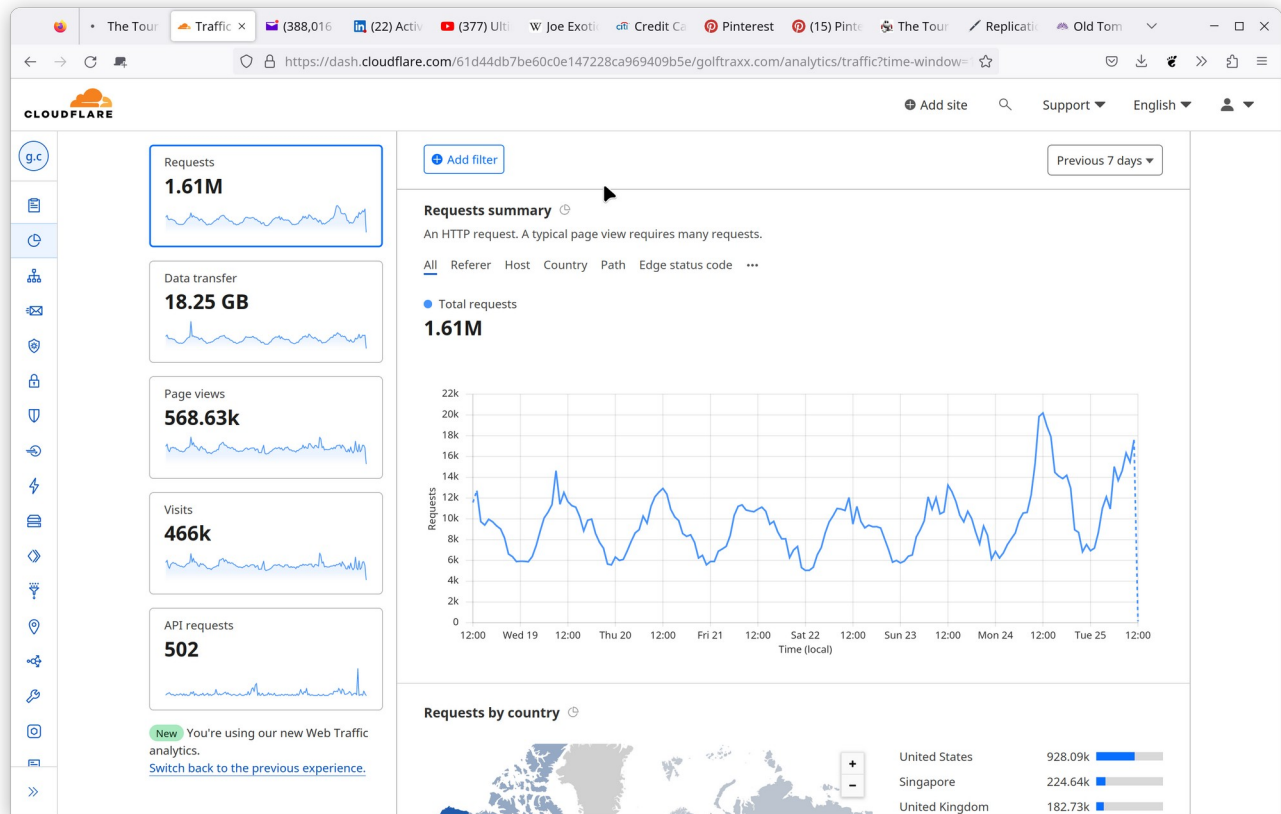

<https://www.ezoic.com/>

ezoic takes Google out AND the guesswork out of monetizing your website while simultaneously enabling you to leverage AI on your website to maximize the monetization component from ads. Ezoic's model is simple. They want to help YOU grow your revenue and they'll take a flat 10%... Not only this but ezoic has seen already what Google (and YouTube) do to cheat other businesses. And this isn't a recent phenomenon. Listen to this YouTube publisher discuss the predatory and covert practices of YouTube towards it's content creators even 5 years ago (and just getting worse as they both struggle for continued relevance and profitability):

https://www.youtube.com/watch?v=NjqjwCeLf_E

**EZOIC WILL FIGHT FOR YOUR SITE AND WORK TO REPRESENT YOUR INTERESTS
BECAUSE THEY HAVE A VESTED INTEREST!**

Just in the very first TWO days, we saw this happen in website volume... prior low volume raised by 60% and the high volume doubled!! RUN don't walk...

Remember, Google is being SUED by 40 countries for CHEATING in it's ad tech business! Google DOES NOT play fair, ESPECIALLY with small businesses. Google takes the lion's share of revenue from every pot it can. Are you an adsense publisher? Google takes 94%. Are you a YouTube publisher? Google takes at least 60%. Are you a website owner or manager using Google Ad Manager. Not only does Google take draconian control of your website look and feel, it takes MORE than 50% of the revenues received.

Ezoic is a partner with cloudflare so if you're a cloudflare customer, you simply sign up at ezoic.com then hand off your website's .com and www DNS entries to ezoic management inside Cloudflare's DNS management.

Ezoic does the rest. Sit back and watch your website ad revenues grow with AI at work for you and observe how YOUR share is substantially larger from the VERY FIRST MONTH!

If each small business owner who reads this signs up and hand off ad management to ezoic, and then on the same day s/he signs up tells ONE other small business owner about ezoic who also signs up, we could CRIPPLE Google's ad revenues to a level where breakup wouldn't just be regulator mandated... it would be required for its survival... in a matter of a few short months.

RUN ... don't walk AWAY from CHEATERS and TOWARDS a business partner who TRULY will be your partner.

All the best!

\$5 million software give-away NOW \$7 million with MORE ways to win:

A year ago, we announced that there would be a re-deployment of our apps into the Android and Apple playstores. That app development work continues through today (a FULL year in development now) and we are LESS THAN 60 days from launch!

We want to celebrate the re-launch of our apps and invite EVERYONE to participate in a FIVE MILLION DOLLAR software giveaway! As many of you know already, we sold our app for \$29.95 per user for PALM, TREO, Pocket PC, and Garmin Ique back starting in 2006 BECAUSE IT WORKED!! We sold thousands and thousands of licenses.

NOTE: Seeing that our source code (developed back in 2006-2008 and remains UNCHANGED in that same form today) which still accurately reports distances on your course today may create some concern about the giant tech companies' credibility, especially as it relates to who made the technology work ACCURATELY around the world FIRST. Those corporations of course include Google, Facebook, Amazon and Garmin. They built businesses worth trillions of dollars, KNOWING FULL WELL that more than a few of them stole our formula. Ask Garmin about their request to provide the source code of our app in 2007 BEFORE they ever had a working Golf GPS device, afterwhich they never contacted us again and cut-off our supply of Iques. Ask Google about it's muti-year deceptions about and attacks towards golftraxx.com

As part of the app re-launch announcement, we also declared that we would be **restoring** the download files to pdazip.com so that all former users (AND anyone else in the BILLION users with access to one of these devices) can now download and use for FREE our previously launched apps (non-iPhone platforms like PALM, Treo, Pocket PC, Garmin Ique. <https://golftraxx.com/downloads.htm>

There are a few different ways you can share the wealth in the \$5 Million Giveaway:

- a. Is there a course you play that we are missing. Submit the course scorecard and a course layout to us to receive a FREE unlimited license.
- b. Is there a course we have that does not yet have the extras for bunkers and streams and such? Submit a kml using Google Earth for the course extras for a FREE unlimited license.
- c. Download ANY of our prior app versions for FREE (Garmin Ique, Treo, PALM, Pocket PC), you can also download (from within the app) ALL course data for our 30,000 courses (updated through today) thanks to our massive site remodel. Any user that sends us hard evidence (screenshots, course photos, etc) showing you using any prior version of our app on any of the 30,000 courses around the world will receive the brand NEW unlimited course version launching in the next 60 days for FREE! Extra credit (BOTH versions!!) for photos showing accuracy of the app versus yardage markers on the course.

d. Any person who submits a clear photo of an up-to-date scorecard (where needed) based on comparison with our current website data (no matter how small the change needed might be) ALSO receives a FREE unlimited version of the new app launching within 90 days.

e. Any person submitting a clear photo of a course map or layout or even a hand drawing (no matter how simple) that shows what direction is north for any unmapped course on our website or any course needing updated mapping (with explanation of change(s) needed) will also receive a FREE unlimited version of the new app launching within 90 days.

f. Any person submitting a kml file or excel spreadsheet containing extras for a course where EITHER we have none or only have tips tees, or where the course is missing extras that should be there will also receive a FREE unlimited version of the new app launching within 90 days.

g. Any person submitting hole flyover URLs from youtube for a course in an excel spreadsheet for copy/paste will also receive a FREE unlimited version of the new app launching within 90 days.

h Any person submitting hole text descriptions for a course in an excel spreadsheet for copy/paste will also receive a FREE unlimited version of the new app launching within 90 days.

As you can see there are LOTS of ways to win! As in over 240,00 ways! Our goal is to make the re-launch apps as successful as possible. To do this, we feel that ensuring that user experience is optimized for each and every course enables more users to have a GREAT experience!

There are now 7.2 million MORE reasons to celebrate with golftraxx.com. Have fun! Let us hear from you!
